

## Makerbot Design Challenge Individual Reflection

List all other group members who worked on the project with you. Rate their group contributions on a scale from 1-10 with 10 being the highest. In the last column, explain why you gave the person that rating and please be specific. When finished, answer the remaining questions below.

Group Member:	Contribution Rating:	Explanation:
Neil	8	Neil did all the work for the board
Morgan	3	She did very little and the main thing she was going to contribute to was the commercial, however she just happened to "lose" her voice;.
Brennan	8	I did all the work for the commercial

1. What rating would you give yourself? Why?

8, I did all of the work for the commercial, including taking morgan's lines and editing all of it.

2. What rating do you think your group members gave you? Why?

Probably a 6-7 Because even though I did the commercial I had a negative attitude for a lot of it. But it didn't stop much from happening

3. What did you learn about working in a group on this project?

I learned that I should do less work and let others take a little more responsibility.,

4. How will you be sure that in the future when working in a group, you are being a positive and contributing group member?

I will try to look at things less negatively and try to implement others.
